

Sanding Sponge - single sided

Product

Hermes single sided sanding sponges are designed for both industrial users and individual craftsmen. The open structure foam allows for higher conformability to severe contours and smaller radiuses. These flexible sponges are excellent tools where hand sanding is the most efficient way of producing the desired surface finishes.

Construction

Abrasive Grain: Aluminum Oxide
Backing: Coated onto 1 side of a 3/16" open structured foam pad
Bond: Resin
Grit Range: Medium (+100)
Fine (+180)
Grain Distribution: Closed Coat

Workpieces

Wood and metal products where the benefits of hand sanding outweigh those of machine sanding. Furniture, cabinets, spindles, drywall and plaster.

Applications

Medium hand sanding of both wood and metal pieces. Wood surface preparation prior to staining or between lacquer coatings. Also off-hand removal of rust and corrosion from metal surfaces.

Advantages of Sanding Sponges

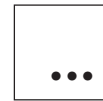

1. Sponge fits comfortably in your hand
2. Tough aluminum oxide grain assures long life
3. Rinses clean for re-use
4. Conformability to severe contours as well as small radiuses
5. Can be used wet or dry

Forms

Sponges -FE 24

Dimensions available:
4 1/2" x 5 1/2" x 3/16"

Type #: 90358
