

webrax AN 707 10

Product

Hermes Abrasives, Ltd. is pleased to announce the addition of AN 707 10 to our offerings of webrax products. AN 707 10 is designed for surface cleaning, deburring, polishing and fine finishing on a wide variety of materials and shapes.

Construction

Abrasive Grain: Aluminum Oxide
Backing: Stitch bonded cloth
Bond: Resin
Grit Range: +80 (brown)
 +100 (red)
Pending: +280 +800

Workpieces

Turbine blades, aluminum rims, bars and tubes, pre-ground welds on steel components. Drilled and punched components, structural cladding, fixtures and fittings. Door strikes, metal tools, measuring instruments and gaming parts.

Advantages of webrax AN 707 10

1. Improved adhesion between backing and bonding system.
2. Flexible to fit forms and contours easily.
3. High performance in deburring operations due to dense construction.
4. High stock removal rates reduce pre-grinding work while providing a consistent surface finish.

Applications

Fine deburring of drilled and punched components. Finishing on structural coil, cladding, fabrications and other fixtures. Polishing of architectural hardware. Fine finishing of airplane engine parts.
