

# Sanding Sponge - double sided

## Product

Hermes sanding sponges are designed to meet the needs of industrial users as well as the individual craftsman where hand sanding is the most efficient way of producing the desired surface finishes. The soft sponge allows for the required conformability in hand sanding operations while maintaining consistent finishes on each workpiece.

## Construction

Abrasive Grain: Silicon Carbide  
Backing: Coated onto 2 sides of a 1/2" flexible sponge  
Bond: Full Resin  
Grit Range: Coarse (+60)  
Medium (+100)  
Fine (+180)  
Grain Distribution: Closed Coat

## Workpieces

Metal and wood products where the benefits or practicality of hand sanding outweigh those of machine sanding.

## Advantages of Sanding Sponges

1. Sponge fits comfortably in your hand
2. Rinses clean for re-use
3. Flexible to conform to contoured as well as flat surfaces.
4. Can be used wet or dry
5. Consistent finishes
6. Long lasting silicon carbide grain

## Applications

Coarse, medium and finish hand sanding of both wood and metal pieces. Off-hand removal of rust and corrosion from metal surfaces, wood surface preparation prior to staining, and intermediate sanding of lacquered wooden surfaces.

## Forms

Sponges  
-FE 24

Dimensions Available: 3 7/8" x 4 7/8" x 1/2"  
Type #: 90550
