

Sanding Sponge - four sided

Product

Hermes 4 sided sanding sponges are designed to meet the needs of industrial users as well as the individual craftsman where hand sanding is the most efficient way of producing the desired surface finishes. The thicker firmer construction makes this an excellent product for sanding slightly profiled or flat surfaces. With abrasives coated onto four sides, these blocks last longer resulting in higher productivity and lower sanding costs.

Construction

Abrasive Grain: Aluminum Oxide
Backing: Coated onto four sides of 1" thick foam
Bond: Full Resin
Grit Range: Coarse (+60)
 Medium (+100)
 Fine (+180)
Grain Distribution: Closed Coat

Workpieces

Moderately profiled or flat metal and wood products where the benefits or practicality of hand sanding outweigh those of machine sanding.

Advantages of Sanding Sponges

1. Sponge fits comfortably in your hand
2. Rinses clean for re-use
3. Tough, long lasting aluminum oxide grain
4. Can be used wet or dry
5. Consistent finishes
6. Abrasives coated onto four sides for extended life.

Applications

Coarse, medium and finish hand sanding of both wood and metal pieces. Off-hand removal of rust and corrosion from metal surfaces, wood surface preparation prior to staining, and intermediate sanding of lacquered wooden surfaces.
