

webrax OA 711 Handpads

Product

Hermes Abrasives, Ltd. is pleased to announce the addition of OA 711 hand pads to our product line. OA 711 hand pads are designed for surface cleaning and finishing on a wide variety of materials and shapes. OA 711 is useful as an efficient alternative to steel wool, wire brushes and emery cloth.

Construction

Abrasive Grain: Aluminum Oxide
Backing: Non-woven web
Bond: Resin
Grit Range: VFN (Very fine = +280/+360)

Workpieces

Metal and stainless steel surfaces of all types, including aircraft engine and body parts, cutlery, medical equipment, jewelry, ceramic insulators, pots and pans, musical instruments. Also wood, plastic and painted surfaces.

Advantages of OA 711

1. Resists clogging due to open structure
2. Flexible to fit forms and contours easily
3. Can be used wet or dry
4. Universal use
5. Consistence performance during product life

Applications

Light deburring, roughening surfaces prior to coating, smoothing and cleaning prior to painting, creating matte finishes, removing rust, oxide and deposits.

Forms

Sheets -FE20

Type #: 71147

Dimensions Available: 6" x 9"

EB: 000

Sanding Machines

Hand pads may be cut for use on jitterbugs, orbital sanders and flat sanders.
